Virginia Pooled OPEB Trust Fund

Letter of Transmittal

October 31, 2018

Honorable Board of Trustees
Virginia Pooled OPEB Trust Fund
Richmond, Virginia

It is our pleasure to submit the *Comprehensive Annual Financial Report (CAFR)* of the Virginia Pooled OPEB Trust Fund (Trust) For the Year Ended June 30, 2018. The CAFR represents a compilation of financial data that details the Trust's financial status. Information contained in this report was prepared in strict conformance with accounting principles generally accepted in the United States of America as promulgated by the Government Accounting Standards Board (GASB). The CAFR is intended to provide readers with a clearly articulated, user-friendly reporting of the Trust's financial affairs. Responsibility for both the accuracy of the data, and the completeness and reliability of the presentation, including all disclosures, rests with the management of the Trust. To the best of our knowledge and belief, the enclosed data are accurate in all material respects and are reported in a manner that presents fairly the financial position and the activities of the Trust.

The CAFR is presented in three sections:

- 1) *Introductory Section* – includes this letter of transmittal, identification of the Trust's administrative organization, and descriptions of administrative responsibilities.
- 2) *Financial Section* – consists of the Report of Independent Auditors, Management's Discussion and Analysis (MD&A), basic financial statements, and the notes to the financial statements.
- 3) *Compliance Section* – consists of the Report of Independent Auditor on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*.

Management's Discussion and Analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. MD&A complements, and should be read in conjunction with, this letter of transmittal.

Background

The Virginia Pooled OPEB Trust Fund, operating pursuant to the Virginia Pooled OPEB Trust Fund Agreement, was established on April 11, 2008, as an irrevocable trust to receive, invest, and disburse funds set aside by political subdivisions of the Commonwealth of Virginia to defray future expenses related to post-employment benefits other than pensions (OPEB). Income of the Trust is tax-exempt under Section 115 of the Internal Revenue Code. The Trust is jointly sponsored by the Virginia Association of Counties (VACo) and the Virginia Municipal League (VML) and operates as the “VACo/VML Pooled OPEB Trust.” Primary benefits of participation in the Trust include professional management of trust assets in two diversified investment portfolios: one with a targeted rate of return of 7.5% and the other with a targeted rate of return of 6.0%. Participants hold individual trust accounts wherein they can monitor the performance of their investments without the burden and expense of directing privately managed individual trust accounts.

As of June 30, 2018, the Trust held 52 employer accounts for Virginia political subdivisions and related governmental entities. In some cases, related employers, such as a primary government and its public school system, have established joint Trust accounts.

The Virginia Local Government Finance Corporation (VLGFC), operating as “VML/VACo Finance,” provides day-to-day administration of the Trust pursuant to a Memorandum of Agreement. An investment consultant is retained by the Trust to provide ongoing investment advice to the trustees. A custodian bank has also been contracted to assist with the management of assets and the reporting of contributions, distributions and employer balances within the Trust.

FY 2018 Highlights

Fiscal Year 2018 saw continued growth for the Virginia Pooled OPEB Trust. The net position of the Trust increased substantially during the year, growing from \$940 million on June 30, 2017, to \$1.06 billion on June 30, 2018.

The Board of Trustees took several key actions in Fiscal Year 2018. At the direction of the Board of Trustees, staff conducted a Request For Proposal (RFP) search for an investment consultant. The Trust’s investment consultant, Asset Consulting Group, had been in place since being selected through an RFP in 2011. After conducting interviews, the Trust renewed its contract with Asset Consulting Group.

After reviewing capital market assumptions and expected rates of return probabilities prepared by Asset Consulting Group, the Trustees decided to lower Portfolio II’s expected rate of return to 6.0% vs. the previous target of 6.5%.

The Board of Trustees decided to liquidate the Trust’s investment in the Grosvenor Institutional Partners hedge fund of funds and redeploy the assets in a liquid absolute return fund and the K2 Mauna Kea platform. The absolute return strategies under consideration provide daily or semi-monthly liquidity vs. the quarterly liquidity offered by the Grosvenor fund. The K2 Mauna Kea platform offers a series of long/short equity funds each pursuing a different strategy. Deploying the assets in the liquid absolute return fund and K2 platform will reduce fees and increase the liquidity of this allocation. The new investments are scheduled to be made in Q2 FY2019.

The Board of Trustees authorized an additional private equity investment in Portfolio I to the Warburg Pincus Growth Fund. This is Portfolio I's third allocation to a private equity fund. Portfolio I's target allocation to private equity is 5%. As of June 30, 2018, the actual allocation to private equity was 0.92%. The difference in the actual allocation relative to the target is due to the nature of private equity which is subject to capital calls over time and to the growth in the market value of Portfolio I.

Summary of Financial Condition

The objective of the Trust is to assist participating employers in providing for their OPEB obligations by generating investment earnings on employer contributions. Individual participating employers engage their own consulting actuaries to determine their long-term OPEB obligations and the sufficiency of current contribution levels to fund the liabilities of each plan. Contributions not necessary for the payment of current expected benefits may be remitted to the Trust for long-term investment. Under Governmental Accounting Standards Board (GASB) No. 75, the gradual, phased-in recognition of previous unfunded OPEB liabilities is ended. Effective with the fiscal year beginning July 1, 2017, the entire unfunded OPEB liability will be reported on the Government's Statement of Net Position.

An optimally diversified investment portfolio is designed to provide long-term returns for a given level of risk as measured by volatility. Portfolio I is designed to produce an expected rate of return of 7.5%; Portfolio II has an expected rate of return of 6.0%. For the period ended June 30, 2018, Portfolio I produced an actual one-year return of 9.60% and a five-year annualized return of 7.33%. Portfolio II, which was established on September 30, 2009, produced an actual one-year return of 5.40% and a five-year annualized return of 5.40%.

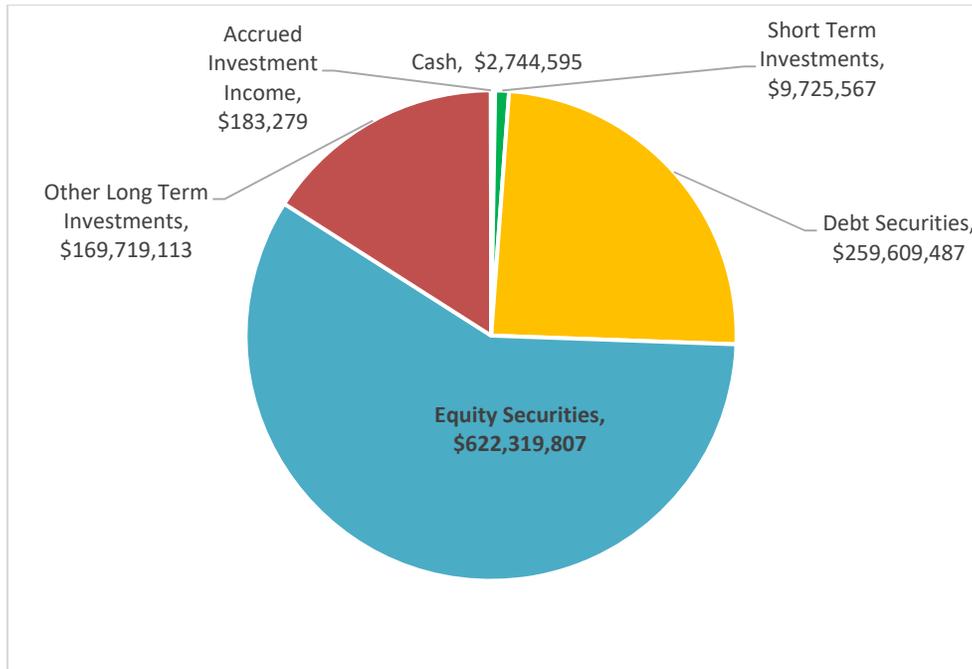

The Trust measures its returns against a customized benchmark, composed of recognized indexes for each asset class weighted by the Trust's target allocation for that asset class. For example, 26.0% of Portfolio I's custom benchmark is composed of the return of the Standard & Poor's 500. For the Year Ended June 30, 2018, the custom benchmark for Portfolio I returned a one-year and five-year annualized return of 8.63% and 7.47%, respectively, whereas the custom benchmark for Portfolio II returned a one year and five-year annualized return of 4.41% and 5.19%, respectively.

The target allocations of the Trust as of June 30, 2018, were as follows:

Asset Class	Portfolio I	Portfolio II
Total Equity	59.0%	32.0%
Large Cap Equity	26.0%	15.0%
Small Cap Equity	10.0%	6.0%
International Developed Equity	13.0%	8.0%
Emerging Markets Equity	5.0%	3.0%
Private Equity	5.0%	0.0%
Fixed Income	21.0%	58.0%
Core Plus	14.0%	40.0%
Core	7.0%	18.0%
Diversified Hedge Funds	10.0%	5.0%
Real Assets	10.0%	5.0%
Real Estate	7.0%	3.0%
Commodities	3.0%	2.0%
Cash & Equivalents	0.0%	0.0%

The target allocations are updated and revised as needed by the Board of Trustees with the advice of an investment advisor.

Value of Investments by Asset Allocation as of June 30, 2018

Independent Audit

For the Year Ended June 30, 2018, the Trust's financial statements were audited by the certified public accounting firm of Dixon Hughes Goodman LLP to provide reasonable assurance that the financial statements of the Trust were free of material misstatement. The audit: a) examined activities, documents, and disclosures used to create the financial statements, b) assessed the accounting principles used by management, and c) evaluated the overall financial statement presentation.

Acknowledgements

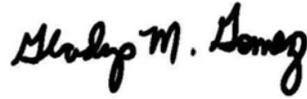

The completion of this report reflects the efforts of the Board of Trustees and staff of VML/VACo Finance working together to achieve the goals of the Trust. The report is intended to provide comprehensive and reliable information about the Trust and allow for the evaluation of responsible stewardship of the funds of the Trust's net assets.

We express our gratitude to the members of the Board, the consultants, the auditors, and the many people who have worked so diligently to assure the successful operation of the Trust.

Independent Auditors' Report

Board of Trustees
Virginia Pooled OPEB Trust Fund

Report on the Financial Statements

We have audited the accompanying financial statements of Virginia Pooled OPEB Trust Fund, which comprise the statement of net position and the related statement of changes in net position, as of and for the year ended June 30, 2018, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net position of the Virginia Pooled OPEB Trust Fund as of June 30, 2018, and the respective changes in financial position for the year ended June 30, 2018, in accordance with accounting principles generally accepted in the United States of America.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 11 through 15 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Virginia Pooled OPEB Trust Fund's basic financial statements. The introductory section is presented for purposes of additional analysis and is not a required part of the basic financial statements. The introductory section has not been subjected to the auditing procedures applied on the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 31, 2018, on our consideration of the Virginia Pooled OPEB Trust Fund's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to prove an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Virginia Pooled OPEB Trust Fund's internal control over financial reporting and compliance.

Dixon Hughes Goodman LLP

Virginia Pooled OPEB Trust

Management's Discussion and Analysis

For the Year Ended June 30, 2018

Management offers the following discussion and analysis as a narrative introduction to the basic financial statements and an analytical overview of the Trust's financial activities for the fiscal year ended June 30, 2018. This narrative is intended as a supplement and should be read in conjunction with the financial statements.

Overview of the Financial Statements

The Trust's financial statements include the following components:

- Statement of Net Position
- Statement of Changes in Net Position
- Notes to Financial Statements

The *Statement of Net Position* presents the Trust's assets and liabilities and the resulting net assets, which are held in trust for the other postemployment benefits of contributing members. This statement reflects a year-end snapshot of the Trust's investments, at fair value, along with cash and short-term investments, receivables and other assets and liabilities.

The *Statement of Changes in Net Position* presents information showing how the Trust's net assets held in trust for other postemployment benefits changed during the period. This statement includes additions for contributions by employers and investment earnings and deductions for payments, refunded contributions and administrative expenses.

The *Notes to Financial Statements* are an integral part of the financial statements and provide additional information that is necessary in order to gain a comprehensive understanding of data reported in the financial statements.

Financial Highlights

- Net position is restricted for future benefit payments of participating localities. Net position at June 30, 2018, totaled \$1.06 billion.
- Outstanding accounts payable at year end were \$576,340. This amount represents fees payable to the program administrator and fund managers.
- The net increase in net assets was \$123.4 million including employer contributions of \$42.1 million with one participant withdrawal of \$15,605.

Condensed Financial Information

In order to ensure the ability of participating employers to properly fund the payment of other postemployment benefits for their employees in future years, it is advisable for employers to accumulate funds on a regular and systematic basis. The principal sources from which the Trust derives additions are employer contributions and earnings on investments.

Comparative summary financial statements of the Trust are presented as follows:

**NET POSITION
June 30, 2017 and 2018**

	2017	2018
ASSETS		
Cash	\$ 2,802,952	\$ 2,744,595

Virginia Pooled OPEB Trust

Notes to Financial Statements

June 30, 2018

1. Organization and Nature of Activities

The Virginia Pooled OPEB Trust Fund (Trust) was established April 11, 2008, for the purpose of accumulating and investing assets to fund post-employment benefits other than pensions for counties, cities, towns, school divisions and other authorized political subdivisions of the Commonwealth of Virginia. The Trust is not a component unit of another governmental entity.

The Trust's Board of Trustees has fiduciary responsibility for the investment of monies and administration of the Trust pursuant to the Trust Agreement. The Board of Trustees is currently composed of nine members. Trustees are members of Local Finance Boards of participating employers and are elected for staggered three-year terms by the participants in the Trust.

The Trust does not purport to present the financial status of each of the participating employer's post-employment benefit plans, nor do these statements contain information on accumulated plan benefits and other disclosures necessary for a fair presentation of the individual plan in accordance with accounting principles generally accepted in the United States of America.

2. Summary of Significant Accounting Policies

Measurement Focus and Basis of Accounting

The financial statements of the Trust are presented as a fiduciary fund type. The economic resources measurement focus and the accrual basis of accounting are used in the preparation of the financial statements. Employer contributions to each participating employers' account are recognized when received. Benefits and distributions are recognized when a formal request from a participating employer's local finance board is received.

Cash and Cash Equivalents

The Trust considers all cash and highly liquid investments with original maturities of three months or less to be cash equivalents. All cash equivalents are recorded at cost, which approximates fair value.

Investments

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 and Note 4 for discussion of fair value measurements. Net investment income consists of realized and unrealized appreciation (depreciation) in the fair value of investments, interest income earned, and investment expense. Realized gains and losses on the sale of investments are recognized on the specific identification basis to determine the cost basis of the investments sold. In order to account for each participating employer's activity, separate accounts are maintained by the Trust. As such, investment and expenses are separately accounted for and maintained by employers.

Taxes

The Trust is exempt from taxation under Section 115 of the Internal Revenue Code. Accordingly, the accompanying financial statements do not include a provision for federal or state income taxes.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Such estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and assumptions.

Termination

The Trust Agreement specifically allows for the termination of the Trust once “all participation interests of all participating employers have been terminated in their entirety.” Partial termination would occur when a participating employer’s interest in the Trust is terminated or when a Trust Joinder Agreement has been terminated. In case of termination, either in whole or in part, affected assets of the Trust are distributed or transferred in accordance with the Trust Agreement to a trust or trusts established by the participating employer(s) for the funding of other postemployment benefits.

Subsequent events

In preparing these financial statements, the Trust has evaluated events and transactions for potential recognition or disclosure through October 31, 2018 the date the financial statements were available to be issued.

3. Investments and Risk

The following information regarding disclosures of credit and interest rate risk are designed to inform financial statement users about investment risks which could affect the Trust’s ability to meet its obligations. The standard of prudence to be used by investment officials of the Trust shall be the “prudent person” and shall be applied in the context of managing the portfolios.

Custodial Credit Risk – Deposits

The Virginia Security for Public Deposits Act (Act) requires financial institutions holding public deposits in excess of amounts covered by federal insurance to pledge collateral to a pool in the name of the State Treasury Board. The State Treasury Board is responsible for monitoring compliance with the requirements of the Act and for notifying local governments of compliance by banks and savings and loans. If the value of the pool’s collateral is inadequate to cover a loss, additional amounts would be assessed on a pro rata basis to the members of the pool. Accordingly, all deposits in banks and savings and loans are considered to be insured. The Trust had no carrying amount or bank balance on deposit at June 30, 2018.

Interest Rate Risk – Investments

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in interest rates.

Foreign Currency Risk – Investments

The Trust's exposure to foreign currency risk derives from its holdings of foreign securities and the use of derivatives to hedge the related foreign currency exposure back to the U.S. dollar. Sources of foreign currency risk include the Trust's investments in international equities, emerging markets equities, and fixed income securities. The Trust's international equity, emerging market equity, and fixed income investments are currently implemented through commingled funds and mutual funds. The managers of these commingled funds and mutual funds are expected to prudently diversify their portfolios. Commingled fund and mutual fund assets are expected to be managed by the manager within the guidelines set forth for each fund.

Credit Risk - Investments

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the Trust. Credit risk is measured by the assignment of a rating by a nationally recognized statistical rating organization. Obligations of the U.S. government or obligations explicitly guaranteed by the U.S. government are not considered to have credit risk and disclosure is not required.

Concentration of Credit Risk - Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. The Trust's fixed income investments are currently implemented through a commingled fund and mutual funds. Commingled fund and mutual fund assets are expected to be managed by the manager within the guidelines set forth for each fund. Managers of these funds are expected to maintain appropriate levels of diversification in their portfolios.

4. Fair Value Measurements

Fair value, as defined under GAAP, is an exit price representing the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. GAAP establishes a three-tier fair value hierarchy which prioritizes the inputs used in measuring fair value. These tiers include:

- Level 1: Observable inputs such as quoted prices in active markets.
- Level 2: Inputs other than quoted prices in active markets that are either directly or indirectly observable.
- Level 3: Unobservable inputs about which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Trust's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

There have been no changes in the methodologies used June 30, 2018. The following is a description of the valuation methodologies used for assets measured at fair value:

Common Stocks

Common stocks in the Trust are publicly traded investments, and are valued daily at the closing price reported on the active market on which the individual securities are traded.

Mutual Funds

Mutual funds are publicly traded investments and are valued daily at the closing price reported on the active market on which the funds are traded.

Exchange Traded Funds (ETFs)

ETFs are publicly traded investments and are valued daily at the closing price reported on the active market on which the funds are traded.

Commingled Accounts

The Trust invests in commingled accounts for which quoted prices are not available in active markets for identical instruments. The Trust utilizes the Net Asset Value (NAV) per share, as determined by the respective investment manager, as the estimated fair value. Because quoted prices in active markets for identical assets are not available, these prices are determined using observable market information such as quotes from less active markets and/or quoted prices of securities with similar characteristics.

Limited Partnership – Fund of Hedge Funds

This fund invests in a number of underlying hedge funds which pursue various strategies. The strategies pursued by the underlying hedge funds include: credit, equity, macro, multi-strategy, and relative value. The Trust's interest in the fund is valued at the NAV of units of the collective partnership. The NAV is used as a practical expedient to estimate fair value. This practical expedient would not be used if it is determined to be probable that the Trust could not redeem its investment at the NAV per unit reported by the fund. Participant purchases may occur monthly. Redemptions are available quarterly upon 70 days' notice.

Limited Partnership – Private Equity

This fund invests in the equity of a variety of privately held companies. The Trust's interest in the fund is valued at the Trust's ownership interest in the collective limited partners' capital. The Trust's ownership interest in limited partners' capital is used as a practical expedient to estimate fair value. This investment can never be redeemed with the fund. Instead, the nature of investments of this type is that distributions are received through the liquidation of the underlying assets of the fund. It is expected that the underlying assets of the fund will be liquidated over a period of six to twelve years. It is probable that the Trust's investment in this fund will be sold at an amount different from Trust's ownership interest in limited partners' capital as of June 30, 2018. The effective date of this fund is December 1, 2015, and it made its inaugural investment in the same month. Barring unusual circumstances, the fund values recent investments in nonmarketable securities at acquisition cost. The primary valuation methodology used to determine the fair value of the fund's investments at June 30, 2018, was recent arms-length financing rounds in which the partnership or other partnerships managed by the general partner had participated. As of June 30, 2018, all underlying investments of the fund were valued at cost.

Limited Partnership – Real Estate

This fund seeks to provide a total return significantly in excess of the return that can be achieved through holding a portfolio of core properties, which is accomplished by executing value-creation strategies with individual investments. The fund invests in the following value-add strategies: stabilization; repositioning; development; renovation; and, leasing. The NAV is used as a practical expedient to estimate fair value. This practical expedient would not be used if it is determined to be probable that the Trust could not redeem its investment at the NAV per unit reported by the fund. Each of the fund’s real property interests generally is appraised every quarter by third-party appraisers through a valuation program administered by an independent valuation consultant. Redemptions are available quarterly upon 60 days’ notice.

Partnership – Real Estate

This fund invests primarily in commercial, industrial, and multi-family residential properties and is valued at the NAV of units of the collective partnership. The NAV is used as a practical expedient to estimate fair value. This practical expedient would not be used if it is determined to be probable that the Trust could not redeem its investment at the NAV per unit reported by the fund. The real estate partnership provides quarterly valuations to the Trust. Individual properties are valued internally by the investment manager quarterly. Internal valuations are completed using valuation techniques such as income capitalization, sales comparison, and cost approaches. Independent external appraisals are generally completed annually. Redemptions are available quarterly upon 45 days’ notice.

	Fair Value as of June 30, 2018

(a) The Baring Focused International Equity Fund seeks to achieve long term capital appreciation by investing in a minimum of 30 issuers, under normal market conditions, which are organized, headquartered, or domiciled in any country included in the Morgan Stanley Capital International Europe Australasia Far East Index (the “EAFE Index”). Issuers may also include those whose principal listing is on a securities exchange in any country included in the EAFE index. Under normal market conditions, the Fund invests a minimum of 90% of its total assets in equity securities. Redemptions are available monthly upon 10 business days’ notice.

(b) Marathon’s philosophy is focused on the capital cycle approach to investment. This is based on the idea that the prospect of high returns will attract excessive capital and vice versa. This philosophy is intrinsically contrarian and the investment ideas are generally very long-term. Marathon invests in developed international equity markets and seeks to outperform the MSCI EAFE Index over a complete market cycle (generally 3-5 years). Redemptions are available monthly upon 5 days’ notice.

(c) The Pioneer Institutional Opportunistic Core Plus Portfolio seeks to substantially outperform the Barclays U.S. Universal Index and a peer group of competing managers without incurring significantly higher risk (volatility). The Portfolio seeks to achieve this objective by actively managing a well-diversified portfolio of U.S. and international investment grade and noninvestment grade debt securities. Redemptions are available semi-monthly upon 5 days’ notice.

(d) Grosvenor Institutional Partners is a globally diversified, multi-strategy, multi-manager portfolio that allocates its assets to hedge fund managers that invest in various alternative investment strategies. These underlying managers and strategies may include long and short positions in equity and fixed income securities. Redemptions are available quarterly upon 70 days’ notice.

(e) The objective of the AEW Core Property Trust (U.S.) Fund is to invest in core real estate assets that will provide investors with a targeted net return that will exceed the NCREIF Fund Index – Open-End Diversified Core Equity (“NFI-ODCE”). The Fund seeks to generate these returns by being disciplined in its approach to the acquisition, asset management and eventual disposition of the Fund’s investments. The Fund will acquire primarily stable properties with strong underlying credit, invest in major liquid geographic markets and property types, mitigate risk by maintaining economic diversification and actively manage properties with a view toward growing net operating income. Redemptions are available quarterly upon 45 days’ notice.

(f) The investment objectives of the TAP Strategy are to provide an enhancement to an investor’s portfolio of financial investments and to provide a partial inflation hedge. The TAP Strategy utilizes a long-only, unleveraged portfolio of primarily exchange-traded, U.S. dollar-denominated futures and forward contracts in tangible commodities. Exchange-traded commodity groups include: agricultural, livestock, foods and fibers, energy, precious metals, and industrial metals. Redemptions are available monthly upon 5 days’ notice.

(g) The Trumbull Property Growth and Income Fund (TPG) is a diversified Value-Add private property fund launched in June 2006. The Fund's focus has been to invest using a broad range of value-added strategies, such as properties with expansion and/or rehabilitation potential, and to use tactical market selection to enhance returns. The Fund's diversification strategy is based on measurements of the market basket of institutional real estate. The Fund utilizes UBS's robust real estate research group to tactically tilt the portfolio to sectors which they perceive to be the most attractive from a risk-return perspective. The Fund invests in the four major NCREIF property types with additional exposure to hotels, land, and debt investments. The Fund can invest up to 25% of its capital in development activities. Redemptions are available quarterly upon 60 days' notice.

(h) Warburg Pincus Private Equity XII (the Fund) is a 2015 vintage year private equity fund that will continue Warburg Pincus' strategy of thesis driven, growth investing at scale on a global basis. The foundation of the firm's investment strategy is identifying talented entrepreneurs and management teams generally tied to a specific thesis. In addition to growth equity investments, the Fund has the ability to invest in transactions of various sizes and types, from early-stage and start-up companies to later-stage transactions that may involve leverage. The Fund has a six-year investment period and a 12-year stated life. The Fund is expected to create a diversified portfolio of 60 – 90 underlying portfolio companies with equity investments ranging from \$50 million to over \$500 million. Redemptions with the Fund are not available.

(i) AB Emerging Markets Strategic Core Equities Strategy is a long-only emerging markets equity portfolio of approximately 70 to 90 stocks. The Strategy seeks to outperform the MSCI Emerging Markets Index by 3 percentage points over full market cycles, while controlling portfolio volatility. The team uses a disciplined bottom-up stock selection process that integrates quantitative and fundamental research to select stocks that are attractive based on quality, stability and price. Redemptions are available weekly upon 10 days' notice.

(j) Apollo Investment Fund IX (the Fund) is a 2017 vintage year private equity fund that will continue Apollo's strategy of value investing at scale on a global basis. Apollo pursues a contrarian, value-oriented investment strategy whereby it focuses on three primary types of investments: Distressed Investments; Corporate Carve-Outs; and, Opportunistic Buyouts. The Fund will target investments in the following sectors: Business Services; Chemicals; Consumer & Retail; Consumer Services; Financial Services; Leisure; Manufacturing & Industrial; Media & Telecom; and Natural Resources. The Fund has a six-year investment period and a 10-year stated life. The Fund has a target size of \$22 billion. Redemptions with the Fund are not available.

5. Related Party Transactions

The Trust has a memorandum of agreement with the Virginia Local Government Finance Corporation (VLGFC), the administrator of a financial services program sponsored by the Virginia Municipal League and Virginia Association of Counties known as, "VML/VACo Finance." Under the agreement, VLGFC serves as administrator for the Trust, which operates as the "VACo/VML Pooled OPEB Trust." VLGFC receives a quarterly program fee calculated individually for each participant on a sliding scale as a percentage of invested assets. The fee covers all administrative costs including personnel, office expense, legal, accounting, and promotion, as well as a portion of investment related custodial services and investment advisory fees. The quarterly program fee during 2018 totaled \$754,130 of which custodial and investment advisory fees comprised \$244,402.

6. Subsequent Events

As of September 30, 2018, the Trust had received contributions totaling \$9,687,586 from nine participants. The market value of net invested assets on September 30, 2018, had increased by \$46,110,934, or 4.38%.

In September 2018, the Board selected the BlackRock Strategic Income Opportunities Fund for its liquid absolute return fund strategy. The target allocation to the BlackRock fund for Portfolio I is 4% and for Portfolio II 2%.

Independent Auditors' Report On Internal Control Over Financial Reporting And On Compliance And Other Matters Based On An Audit Of Financial Statements Performed In Accordance With *Government Auditing Standards*

To the Board of Trustees
Virginia Pooled OPEB Trust Fund

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Virginia Pooled OPEB Trust Fund, as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the Virginia Pooled OPEB Trust Fund's basic financial statements, and have issued our report thereon dated October 31, 2018.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Virginia Pooled OPEB Trust Fund's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Virginia Pooled OPEB Trust Fund's internal control. Accordingly, we do not express an opinion on the effectiveness of the Virginia Pooled OPEB Trust Fund's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Virginia Pooled OPEB Trust Fund's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
